## Climate

Type of climate

Moderately  
continental

Average annual  
temperature

January - 4-6<sup>0</sup>  
C

July + 24-26<sup>0</sup>  
C

- The district's territory lies in a temperate climatic zone with a steppe climate.
- Very often, the district experiences the impact of atmospheric fronts, leading to frequent weather changes, especially during the cold season. The climate is also affected by the extensive river network.
- The moisture evaporating from the mirror-like surface of rivers enters the air, causing frequent and dense fogs in spring and fall.
- On average, there are 280 sunny days per year.
- The average annual temperature is 10 °C (50 °F).

## **Mineral resources**

Sand

Clay

## **Fresh water reserves**

high

- The main waterways of the district are the rivers the Rassypnaya, the Mekleta, the Razshevatka and the Kalaly
- The population of Belaya Glina district receives water from 64 underground water sources.
- There are two large water pipelines in Belaya Glina village (MUP Beloglinsky Vodokanal) and Uspenskaya village (departmental OAO Uspensky Agropromsoyuz), each equipped with headworks and disinfection facilities.
- Other settlements receive their water supply directly from artesian wells.

## Fertile lands

Total amount

136.4 thousand  
hectares

- To date, several deposits of local building materials have been discovered: sand, clay, loams.
- Sands consist of multiple grains, including mica.
- Clays and loams are heterogeneous and porous, with a lumpy structure.

## Recreational resources

- Water resources of Belaya Glina district are mostly rivers and ponds. The following rivers flow through: Rassypnaya (a tributary of the Middle Egorlyk), Kalaly (a tributary of the Egorlyk) and Tatarka (a tributary of the Kalaly river)
- The mineral content in rivers and ponds has increased, ranging from 3,000 to 5,200 mg/l. Sulfate and bicarbonate ions are the most common minerals found in the water.
- Spring of the Lenin Collective Farm natural landmark and the Spring of the Russia Collective Farm natural landmark.
- The wildlife in the region's steppe zone is diverse, with over 600 animal species documented in Krasnodar region. There are around 320 bird species, 163 fish species, 86 mammal species, 21 reptile species, and 11 amphibian species.

## The Rassypnaya river

The Rassypnaya River is a typical flat river with a flow rate of 0.1 m/min. Its depth ranges on average from 1.0 to 2.5 m, reaching a maximum of 4 m with a channel width of up to 17 m. The river is replenished by atmospheric precipitation and groundwater. The total evaporation from the river surface is 67.3%, while the surface runoff is 22%.

# Priority industries for attracting investments

## Agro-industrial complex

### Factors that make an industry attractive for investment

Belaya Glina district is primarily focused on agriculture, with economic growth opportunities linked to the advancement of agricultural production and processing. Livestock farming, including cattle, pig breeding, and in some cases, sheep, forms the foundation of the district's agricultural activities. Crop cultivation makes up 80% of the overall agricultural output. In 2023, the total grain harvest reached 501.3 thousand tons.

### The largest enterprises of the industry

The agrarian complex of the district is represented by 1 large and 5 medium-sized enterprises, 11 small entities, 258 peasant-farms and more than 11 thousand private subsidiary farms.

## Industrial sector

### Factors that make an industry attractive for investment

The manufacturing industry holds a prominent position among the fundamental types of economic activities. In 2023, the total value of manufactured goods reached 5.9 billion rubles. Since 2018, there has been a steady increase in the profit earned by businesses in Belaya Glina district. Over the last six years, the profit has grown by 858.0 million rubles, reaching 2.1 billion rubles in 2023.

## Resorts and tourism

### Factors that make an industry attractive for investment

The resort and tourism industry now offers a water park as part of its updated amenities. It's like an actual oasis, offering a fantastic setting to enjoy a day with family or friends. The park provides all the necessary amenities for guests to feel completely at ease. After enjoying the water slides and pool, visitors can unwind and sunbathe on lounge chairs. In order to preserve Kuban traditions and historical and cultural heritage in the village of Novopavlovka, the Visiting Grandma Museum-estate project was implemented. The museum is a traditional Kuban adobe hut. To construct it, a folklore research trip was carried out in the community, with enthusiastic involvement from young people. Tourists visiting Belaya Glina district might find the following natural attractions interesting: Spring of the Lenin Collective Farm natural landmark and the Spring of the Russia Collective Farm natural landmark.
